## I.T. RETAIL SOLUTIONS

Designed with stand-alone retail outlets, multiple stores or chain stores in mind, the HRK Retail system is flexible enough to cater for both the needs of a small store and the needs of multiple stores, which require information at the head office to maximise the utilisation of stock in various branches. As simple to use as a conventional cash register, price effective and fast, yet secure to operate.

IMAGINATIVE, INNOVATIVE, YOUR SYSTEM PARTNER FOR THE FUTURE.

# POINT OF SALE

## GENERAL RETAIL

**T**ight financial controls are in place and individual cashier performance can be monitored.

Linkage via HRK banking terminal to all the main banking institutions allows for speedy processing of credit and debit card transactions and the downloading of recharge vouchers for pre-paid telephone systems.

Internal stock control module or alternatively linked to the HRK Centurion stock control software with optional Creditors, Debtors or Invoicing modules available.

Interfaces to major financial packages such as Accpac or Pastel accounting.  
Handles all SANA approved barcodes including price or weight embedded barcodes.  
The HRK system can interface to a variety of scales or other external devices.
