PROUDLY SOUTH AFRICAN

HRK TODAY

HRK has adapted to the fast changing business environments and the need to process data online, reliably and securely. Telkom SA has relied, for more than 14 years, on the HRK expertise to process their customers payments. The City of Cape Town has awarded HRK the contract to upgrade their system, which has been in use for more than 12 years, to take advantage of the latest state of the art technology and to suit the requirements of the newly created Unicity. The Lilongwe Water Board in Malawi relies on HRK to effectively control the payment of water bills in remote areas and towns. HRK provides local solutions for local challenges, uniquely South African - proudly South African.

IMAGINATIVE, INNOVATIVE, YOUR SYSTEM PARTNER FOR THE FUTURE.

POINT OF SALE RECEIPTING SOLUTIONS

HRK: A BRIEF HISTORY

HRK was established 40 years ago and specialises in receipting solutions for government, parastatals, municipalities and any other applications requiring control over payments and processing of subsequent data. Since its inception HRK has provided customised solutions for the South African Post Office, Telkom, the Receiver of Revenue, various municipalities, and parastatal institutions. HRK has acquired vast knowledge of the processes involved in receipting payments using state of the art technology, hardware and software.

WHY HRK

Most billing systems have simple receipting modules which accept payment and update the billing systems. HRK has developed sophisticated receipting systems capable of capturing essential data for processing by the billing systems. Receipting has to be fast, simple and secure.

WHAT PAYMENTS CAN BE ACCEPTED

- CASH PAYMENTS - With automatic calculation of change.
- CHEQUE PAYMENTS - For single or multiple accounts with cheque verification and overprinting of cheques with amount, date, payment details etc.
- CARD PAYMENTS - Either debit or credit cards with on-line banking interface to ensure that the card payment is processed online.
- SMART CARD PAYMENTS - To deduct amounts due from smart purses.
- BANK TRANSFERS - HRK consolidates the payment via internet banking or transfers to ensure reconciliation at the end of the day or shift. The systems can function on-line or in batch mode where transfer of data is not possible due to lack of infrastructure.

HRK NERO MOBILE SOLUTIONS. "BRING THE SERVICE TO YOUR CUSTOMER"

HRK has developed terminals which can be placed in mobile units such as trucks. These trucks move into remote areas to facilitate collection of outstanding monies for services rendered. This makes it easy and affordable for remote communities to pay their bills. By bringing services to the customer, cash flow is increased and bad debt reduced without having to employ expensive collection agents to perform these tasks.

HRK POS NERO HARDWARE

- STANDARD PC TECHNOLOGY - Touch screen panes, for ease of training and operation, can be wall mounted to save space in cashier cubicles.
- RECEIPT PRINTERS - Thermal receipts for speed of operation. Overprinting of documents, single or double endorsements. Multiple copies can be handled by the dot matrix printing station. Printing of cheques with receipt details on the back. Electronic or hardcopy audit trail.
- KEYBOARDS - Customised keyboards are available with integrated magnetic card readers or optional smart card readers.
- SCANNERS - Fixed or hand held scanners to process receipting information in one single scan thereby reducing incorrect data capture and reduce the processing time. Barcodes can be configured to read in one single scan the account number, allocation code and the amount due.
- CASH DRAWERS - Sturdy and secure and can be fixed to counter units. Slots for depositing cheques and credit card vouchers without having to open the drawer.
