I.T. RETAIL SOLUTIONS

The HRK software has been designed in co-operation with leading hotels and restaurants on the principle "keep it simple, make it fast".

This has been achieved by the HRK team which today offers a robust system, that is easy to operate, fast and secure. A minimum of training is required to operate the system.

IMAGINATIVE, INNOVATIVE, YOUR SYSTEM PARTNER FOR THE FUTURE.

Available in both touch screen or keyboard module, the system users optimise their requirements by choosing peripherals to suit their business. The HRK system employs open system architecture which allows the use of various types of hardware such as remote printers, banking terminals, customer displays and cash drawers. Stand alone modules or multiple terminals, can be linked to the HRK Centurion Back Office Software or financial systems such as Accpac or Pastel and a variety of other applications.

FEATURES

- Very user friendly and easy to use
- Stand alone or networked
- Programmable colour icons
- Multi layer screens
- Up to 12 remote printers
- Live electronic journal

- Multi levels of authority

- Robust operating system
