

RE: REFERENCE ON HRK

It gives me great joy to share my success with others looking for a software package that is complete and comprehensive. As we all know, “time is money”, so for us To have software which is user-friendly is of great importance.  
We have installed a touch-screen at the cashier terminal, which is fast and very user-friendly, this was not possible on our previous software.  
The stock control and purchase order system is a pleasure to work with.  
The HRK software has proven itself to be a great Improvement from our previous software.

The HRK team respond to all queries in a quick and professional manner when required. We wish to thank all at HRK for their support and after sales service.  
All the best for the future.

Yours truly
